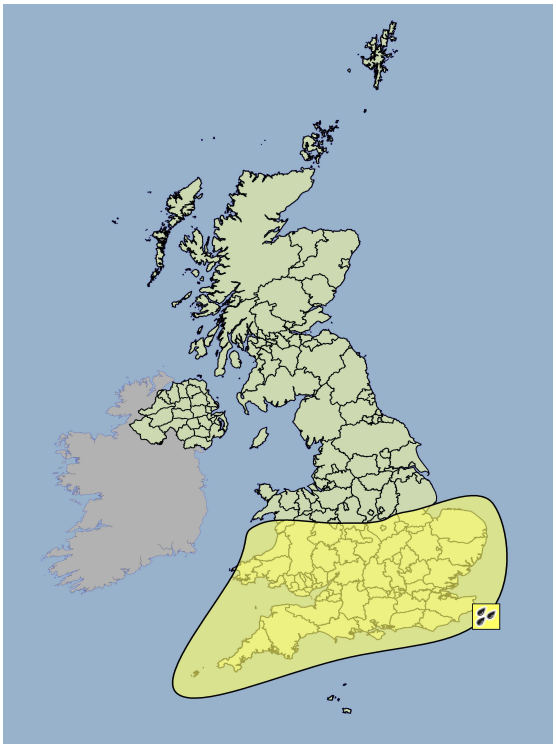
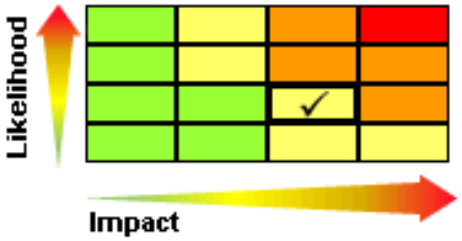
National Severe Weather Warning Service





Chief Forecasters Assessment
An area of warm, humid, unstable air will move north across the region today and tonight. Thunderstorms bring the potential for 20 to 30 mm falling within an hour or so, probably on a very localised basis and more likely roughly Dorset and Somerset eastwards to Home Counties. More persistent rain will give 10-20 mm quite widely over southwest England and south Wales with the risk of more than 40 mm locally.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **11:00 on Fri, 12th Jun 2015** until **09:00 on Sat, 13th Jun 2015**

Persistent rain, locally very heavy, will spread across southwest England and south Wales today, whilst isolated severe thunderstorms may well develop further east bringing the risk of torrential downpours. Rain and showers will spread north through Friday night into Saturday morning, easing with time.

Whilst most places will miss the heavier rain, the public should be aware that there is a chance of some very localised significant disruption, mainly from surface water flooding. Lightning and hail could also cause some impacts.
